Make, Model Number, and Open Area of Proposed Replacement Covers:			
Covers Obtained from and Installed by:			
Expected Installation Date:			
DEQ Approval:			

This form is used to determine if a proposed set of replacement suction fittings will meet the requirements of the Public Swimming Pool Rules, specifically R 325.2142 (Rule 42). Rule 42 requires main drains and other outlet covers to have a total open area sufficient to assure flow velocities of not more than 1 foot per second.

It is our understanding that the federal Virginia Graeme Baker Pool & Spa Safety Act of 2007 requires covers certified to ASME A112.19.8-2007 or 2008a. Providing certified drain covers without changing the attachment frame and/or drain sump may not fully comply with this standard. If the proposed covers are both certified and meet the Michigan flow velocity requirements, then the installation will be approved and the date on this form will be recorded in our database. A copy of this form will also be forwarded to the local health department.

Please fax or e-mail this completed form to:
